

## **PROGETTO EDUCHANGE**

### **...i nostri *teachers' assisitants* si presentano e raccontano le loro prime impressioni**

#### **ESTEFANIA**

Hi! I Am Estefanía. I'm 23 years old and I come from Colombia. At university I studied industrial design. Right now, I am in Italy to share my culture and teach the school community some things about Colombia.

My first week at Istituto Comprensivo Assisi 3 has been amazing. These days I've met students from many classes, and I've learned a lot, not only from the students at school, I've learned a lot about the Italian educative system as well. It's been a pleasure to be at school and learn about Italian culture. I've tasted a lot of delicious Italian food, and also visited Assisi and Perugia with Josué, the other volunteer.

There are no words to say how grateful I am with all institute's community. My first week in Petrignano has been unbelievable. Teachers, students, and all the community have given me the best welcome ever, and of course the best impression of Italy. So far, for me, Italian people is the kindest people of the whole Europe.

#### **JOSUE**

Hello! My name is Josué, I'm 18 years old and I am from Mexico

As I arrived I immediately found a lot of differences between the Mexican education system and the Italian one. I think that Italy is better because, for example, you can learn two languages in a public school and that is not possible in Mexico neither in Latin America.

In Italy students don't have to pay for a good education while in Mexico almost all the time students have to pay. Visiting Assisi, Perugia and Petrignano has already changed my vision of Italy and it has been amazing.
